● EDUCATION

Master of Design

IISc Bengaluru · 2012–2014

Bachelor of Architecture

MIT Aurangabad · 2005–2012

● DESIGN TOOLS

VSCode + Copilot · Claude Code (hi-fidelity prototyping) ·

Figma, Figma Make · Adobe Illustrator ·

Adobe Photoshop ·

AI Image Generation - Firefly · Midjourney · Copilot · Dall-e

● RESEARCH & VALIDATION

Human-Centred Design ·

Jobs-to-be-Done Framework ·

Moderated Usability Testing · Contextual Inquiry ·

Heuristic Evaluation · Journey Mapping ·

Service Blueprints · Competitive Analysis ·

AXE / WCAG 2.2

● TECHNICAL

HTML/CSS (working knowledge) · Agile / Scrum ·

Agile Studio (Scrum project and collaboration tool) ·

GitHub Copilot · GitHub

● DESIGN SYSTEMS

Pega Constellation · Theme Cosmos ·

IBM Carbon (studying)

● AI PRACTICE

Vibe Coding · AI-assisted Research Synthesis ·

MCP Integration · SKILL.md Authoring ·

Automated Design QA with Playwright

● RECOGNITION

Spot Award

Workflow detection (Fingerprinting), Pegasystems

Spot Award

AI experimentation & augmented workflows, Pegasystems

Team Splash Award

Launchpad Boosters, Pegasystems

GenAI Hackathon Finalist

AI-integrated Agile Studio, Pega-wide

10 years translating complex business and regulatory requirements into intuitive enterprise UX — authorization systems, data-heavy compliance workflows, and government-scale platforms — partnering with global, cross-functional teams from research through delivery.

■ CORE STRENGTHS

Adaptive in Ambiguity

Creating design strategy shaped by the problem — grounded in research and adapted as findings and constraints evolve — owning the full arc from problem definition through interaction design, AI-assisted synthesis and prototyping, dev collaboration, and stakeholder alignment. Always toward the best product outcome.

Bridging Disciplines Through Design

Bridging product, engineering, research, and operational perspectives by creating shared language and shared understanding through design. Workshops, structured walkthroughs, and design artefacts that bring teams to the same picture of the problem and the direction forward.

Uncovering the Real Problem

Investigating beyond what's apparent as the problem — finding where friction actually originates, and reframing the design challenge from there. Presenting the diagnosis to product teams and getting alignment before designing — so the solution addresses the real problem, not just its symptoms.

■ EXPERIENCE

Product Designer, UX
Pegasystems

May 2022 – Present

- Designed **AI-powered workflow detection feature (Fingerprinting)** end-to-end — replaced a manual multi-week discovery process with instant workflow suggestions; validated through **scripted task-based usability studies** with enterprise clients, measured via task success rates and qualitative feedback. **Spot Award.**
- Designed a **client screening workflow for KYC** — client identification, database matching, and risk tagging (including PEP flags) leading to an approve/reject decision. Restructured a fragmented, UI-driven flow to match the analyst's actual process, surfacing dense compliance data at the right steps without overwhelming the reviewer. Built **modular** — designed once, reusable across similar screening use cases.
- Designed **Object Centric Process Mining (OCPM)** concept — introduced a more advanced cross-departmental unit of analysis without disrupting the application's existing **information architecture** or mental model; OCPM analytics design shared in Pega's **Gartner review**, recognised by Director of Process Mining.
- Established **AI-augmented design workflows** at Pega — documented techniques published as the team's **AI onboarding resource**. **Spot Award.**
- Structured a unified **ABAC + RBAC authorization system** — combined two distinct authorization paradigms into a single view exposing both **broad-level configuration and granular detail**, made intuitive to configure despite inherent complexity.

UX Designer
Illumine Foundation

Aug 2021 – May 2022

- Led UX for **Karmayogi** national skilling platform — synchronised web + mobile reaching 100,000+ public sector employees
- Ran **on-site contextual inquiries** with Station Masters and frontline staff; translated field insights directly into design
- Managed third-party dev team; delivered complete mobile UX within one month

UX Specialist
Expert Global Solutions

Oct 2016 – Mar 2020

- UX owner for enterprise **IoT monitoring platforms** for Coca-Cola, Alliance Laundry Systems, and R&D environments
- Facilitated **discovery workshops** with client leads, product owners, and development heads aligning KPIs with UX requirements
- Authored full **UX Requirements Documents** from strategy through post-release validation
- Conducted **heuristic evaluations**, competitive benchmarking, and standardised usability practices

■ INDEPENDENT PRACTICE

Founder & UX Lead
Cerebrum LLP

Oct 2020 – Aug 2021

- UX consultancy for early-stage startups — product definition, design delivery, client communications end-to-end

Proprietor
Exalt Design

Dec 2014 – Dec 2016

- UX, branding, and visual design for regional businesses; mentored a small design team
